

MERIDIAN TALENT PARTNERS OOD

Technology & Systems Inventory

Prepared by Operations Director | April 2026 | INTERNAL — Not for Distribution

Overview

This document inventories all software systems, tools, and services currently in use at Meridian. Compiled in preparation for the Vincere ATS migration and the AI Value Blueprint engagement. Total estimated annual software spend: **€142,800** (FY2025 actuals). FY2026 projected at ~€168,000 due to Vincere cost and additional seats. The company runs no on-premises servers — all systems are cloud-based SaaS.

Core Business Systems

System	Vendor	Category	Users	Annual Cost (€)	Status & Notes
Vincere	Vincere Technologies (UK)	Recruitment CRM/ATS	68 seats (planned)	18,000	IMPLEMENTING — 40% migrated as of May 2026. Target full cutover July 2026. Replaces Zoho Recruit.
Zoho Recruit	Zoho Corp	ATS (legacy)	68 seats (active)	9,600	LEGACY — Being decommissioned. Data migration to Vincere in progress. ~35% of 47K records are stale.
Xero	Xero Ltd	Accounting/Invoicing	8 users	2,400	ACTIVE — All invoicing, AP, management accounts. Clean, reliable, reconciled data. Xero API available.
Microsoft 365	Microsoft	Email/Teams/SharePoint	68 seats	14,280	ACTIVE — Primary productivity suite. SharePoint used for document storage but inconsistently organised.
LinkedIn Recruiter	LinkedIn / Microsoft	Sourcing & Talent Intel	12 seats	38,400	ACTIVE — Core sourcing tool. AI suggestions rated unreliable for specialist roles. High usage regardless.
DocuSign	DocuSign	e-Signature	5 seats	1,800	ACTIVE — Offer letters, contractor agreements, client contracts.
Calendly (Business)	Calendly	Scheduling	14 users	1,680	ACTIVE — Not standardised; ~40% consultant adoption. Used individually, not as company-wide standard.
Slack (Pro)	Salesforce	Internal Messaging	68 users	4,800	ACTIVE — Introduced January 2026. ~60% adoption. Some teams still prefer Teams; inconsistent usage.
Google Workspace	Google	Email/Docs (legacy)	8 licences	1,440	PHASE-OUT — Used by 8 research team staff. Migrating to M365 by end Q3 2026.
Accendo Payroll	Accendo Bulgaria	Payroll bureau	N/A (bureau)	4,200	ACTIVE — External payroll bureau. Payroll data not integrated with Xero or any other system.

Productivity & Collaboration Tools

Tool	Category	Users	Annual Cost (€)	Usage Notes
Microsoft Word / Excel	Document creation, tracking	All staff	Incl. M365	Heavy use for CV formatting and tracking spreadsheets. No standardised templates enforced.
SharePoint (M365)	Document storage	All staff	Incl. M365	Used for shared documents but inconsistently structured. No search-friendly taxonomy or naming convention.
Teams (M365)	Video calls, chat	All staff	Incl. M365	Primary video call tool. Used alongside Slack, causing some duplication and confusion.
Outlook (M365)	Email	All staff	Incl. M365	Primary email client. Client/candidate comms via email; not well integrated with ATS.
Lusha	Contact enrichment	Cancelled	Cancelled 2025	Trial ran 6 months. Poor data quality for CEE candidates (~40% accuracy). Discontinued.
ChatGPT (individual)	AI writing / drafting	~6–8 users	~€600 est.	Individual Plus accounts; no company policy, no shared prompts, no oversight or GDPR governance.

Data Infrastructure Assessment

Meridian has **no data warehouse, BI platform, or analytics infrastructure**. All reporting is produced manually from system exports compiled into Excel. There is no single source of truth for operational performance. Key data quality assessment by domain is summarised below.

Data Domain	Where It Lives	Quality	AI Readiness
Candidate profiles & history	Zoho Recruit / Vincere (migrating)	POOR	ATS API available (Vincere); needs data cleaning and GDPR consent audit first
Placement history (9 years)	Zoho Recruit + manual archives	MODERATE	Placement records exist but skills tagging is inconsistent; some historical data needs manual export
Financial data (invoices, revenue)	Xero	GOOD	Xero REST API available; clean and reconciled; not currently used for any analytics
Client contacts & account data	ATS + email inboxes + personal notes	POOR	Fragmented; much lives in individual email and LinkedIn — inaccessible to any system
Sourcing activity & engagement	LinkedIn Recruiter (locked)	N/A	LinkedIn data is not exportable in structured form; no API access to sourcing activity
Time-per-mandate / productivity	Not tracked systematically	ABSENT	No time tracking tool; would require new instrumentation before any AI productivity analysis
Candidate skill taxonomy	Ad hoc tags in ATS	POOR	No standardised taxonomy; free-text skills fields only; low value until taxonomy standardised
GDPR consent records	Partially in ATS, partially in email	POOR	Pre-2021 records lack documented consent — cannot use for AI training without full audit

Integration status: There are **no active integrations** between any of the above systems. All data exchange is manual (CSV exports, copy-paste). The Vincere ATS has documented API capabilities; Xero has a REST API. No integrations have been built or are currently planned.

Inventory compiled by the Operations Director, April 2026. Costs are approximate annual figures from vendor invoices or subscription records. Shadow IT (individual tool subscriptions not centrally managed) may exist and is not captured here.
